## Interlude

### Verse

Slow your role. You gon fall In love you but see I'd hate to  
I had?hope.?You thought you?could rescue me, I saved you  
I?went broke. Pay all attention that I gave you  
Like a dot. You connected to me plug your cable  
Hit the block. Like Obama tryna see some change soon  
She a star. Sparkle like the liquor on the table  
Take a shot. From that vodka you gon need some grape juice  
Writers block. But it's written all over your facial  
You were strong and Through the hard ship and it really changed you  
You wild and You would always think I couldn't tame you  
I know I left you broken. I would always break rules  
You were baby on the phone. Now I pick up like hey you  
Tripping hard, from day two  
Guess I fell in love  
On my camera roll  
Got your catalogue  
I realize I'm wrong  
Almost had it all  
Nothing's is left all  
All is set and stone  
I can set the tone  
Tryna plan my goals  
Final episode  
You my best  
You gon always be my best  
I just wanna touch your touch your soul. See It ain't always bout the sex  
Keep your focus on the present  
You can't worry on your ex  
Need to worry bout your flex  
Keep your focus on the next  
Keep it going. Keep it going  
Always keep it to your left  
No emotion. No emotion  
Keep my feelings all check  
And I know. And notice that you always been upset  
And I'm always sending texts

Think I know what's coming next

Holy father why you put me through this test  
Getting answers to the questions I don't ask  
Got me where want me. I think needed that  
Gave me all your love and now you took it back

Now I'm tryna fix it like a broken glass  
But you stuck with me a Glued the pieces back  
Tryna kill my spirit. I can't live with that  
Tryna kill my spirit. I can't I've with that

Plenty colours, rainbow. Where the grass is green  
Though we had potential. Couldn't last a week  
Living out a fable. Life Is but a dream  
I feel like the same coach. On a different team  
How do you tell when I'm honest  
It's hard to say when it's true  
Don't you go breaking your promise  
You the one making the rules  
Ain't really solving a problem  
The problem with solving is you  
I leave a like and a comment  
You leave my messages blue  
Damn you. Yay you  
See I tried. To hate you  
But I'm fine. Thank you  
Just one night. It takes two
