

Be With Me

Anabel Englund

[Verse 1]

When everything's been said
And we're lying here in bed
Hope this doesn't happen next week
Oh you seem so sure
After we fought in war
Can I see your white flag please
I'm telling you my fate
Before it gets too late
'Cause I'm falling to a place
Where I sleep it all away

[Chorus]

But I have the option
To leave, to leave
And you have a reason
To be, to be
This isn't what we wanted, was it lovely?
It kills me
But I have to go now
And be with me

[Verse 2]

Oh baby we can try
Ten thousand other times
So we never have to let go
There's nothing we can do
It just isn't the time
When our souls together don't rhyme
I'm telling you my fate
Before it gets too late
'Cause I'm falling to a place
Where I sleep it all away

[Chorus]

But I have the option
To leave, to leave
And you have a reason
To be, to be
This isn't what we wanted, was it lovely?

It kills me
But I have to go now
And be with me

[Pre-Chorus]
Sometimes we think
Us is what we need
But maybe it's best
You beeing you and me beeing me

[Chorus]
But I have, the option
To leave, to leave
And you have a reason
To be, to be
But I have the option
To leave, to leave
And you have a reason
To be, to be
This isn't what we wanted, was it?
It kills me
But I have to go now
And be with
