SPACEMAN

Mew Suppasit

Yesterday, I was on Earth
Oh, but now I'm up in space
Looking for a trace of you

In the universe
I would look for you on Mars
The Sun, the Moon, the stars

I know that I'll find you someday
No matter how far away

I'm a spaceman floating in a tin can
Looking for somebody to hold
When I get cold
I'm on Pluto speaking down the radio
Do you hear my call?
Is anybody out there at all?

Won't you give me a sign?
Make explosions in the sky
Right before my very eyes

Make the stars align
Baby, you don't need to hide
But I must love you 'til the end of time

I know that I'll find you someday
Even if you're light years away

I'm a spac?man floating in a tin can
Looking for somebody to hold
When I get cold
I'm on Pluto sp?aking down the radio
Do you hear my call?
Is anybody out there at all?

I'll go through black holes and meteors
So, I can be completely yours
And then my world will be restored
(I'm a spaceman x 2)

I'm a spaceman floating in a tin can

Looking for somebody to hold
When I get cold
I'm on Pluto speaking down the radio
Do you hear my call?
Is anybody out there at all?
