

Like Everybody Else

Lennon Stella

Run fast, run away
Run straight into the loneliness
It isn't only home I miss
Like the night all my friends got together
Heard about it afterward
Didn't think was gonna hurt so much
Why, if I'm doing so well, did I build a wall between me and the world

Been drilled in my head forever, be better
Turns out I'm just like everybody else
Don't even go near a mirror, It'll kill 'ya
Trust me, you don't wanna see yourself
Fuck the noise, it's too late, it's the choices
I don't even wanna be someone
What made me think I was special, I'm not special
Turns out I'm like everybody else

That's nice, champagne
What a shame it doesn't work on me
So, don't go wasting your money
Everybody in this room's too hot, too pretty, I'm tired
I just wanna be nobody

Been drilled in my head forever, be better
Turns out I'm just like everybody else
Don't even go near a mirror, It'll kill 'ya
Trust me, you don't wanna see yourself
Fuck the noise, it's too late, it's the choices
Oh, Now I don't even wanna be someone
What made me think I was special, I'm not special
Turns out I'm like everybody else

Oh
What made me think I was special, I'm not special
Turns out I'm like everybody else
