

# Talk To Myself

Avicii

Alone i'm searching for devotion  
In a faded melody  
My soul is trying to cross an ocean  
Down on bended knee Locked up my code and rhyme  
Don't know what I try to say  
My heart all the time was stolen  
By bad poetry Some nights I talk to myself  
I say the words that I could say to no one else  
And some nights I talk in my sleep  
I said the words I never said when you were with me  
Some nights I talk to myself  
I said the words that I can't say to no one else  
And some nights I talk in my sleep  
I said the words I never said when you were with me I'm gone, the nightmares cut me open  
Love's insanity  
So long words are left unspoken  
Couldn't set them free Watch all the language run dry  
Thoughts go on holiday  
My heart, I'm left with a broken  
Vocabulary Some nights I talk to myself  
I say the words that I could say to no one else  
And some nights I talk in my sleep  
I said the words I never said when you were with me  
Some nights I talk to myself  
I say the words that I could say to no one else  
And some nights I talk in my sleep  
I said the words I never said when you were with me  
Some nights I talk to myself  
I say the words that I could say to no one else  
And some nights I talk in my sleep  
I said words I never said when you were with me
