

# Turn It Around

**Randy Travis**

I can't believe I'm standin' out here in the yard  
Starin' at those tread marks you left with your car  
Before you get too far out of town  
I hope you turn it around I didn't think you had it in you  
Who'd have thought you'd really leave  
It's kind of like some movie I wish I'd never seen  
You left and left my world upside down  
You've got to turn it around  
It's safe to say I've underestimated how strong you are  
Apparently girl you've got what it takes to break my heart  
You're everything I need I know, right now I wanna hold you close  
And all I can do is pray that you'll come home It's probably a safe bet that you ain't comin' back  
I made some big mistakes, I'll admit to that  
If there's still a chance that we can work this out  
My life's gotta change startin' now  
I'm goin' to turn it around It's safe to say I've underestimated how strong you are  
Apparently girl, you've got what it takes to break my heart  
You're everything I need I know, right now I wanna hold you close  
And all I can do is pray that you'll come home  
I can't believe I'm standin' out here in the yard  
Starin' at those tread marks you left with your car  
Before you get too far out of town  
My life's gonna change startin' now  
I need to turn it around, baby turn it around
