

Freeway

Jesse Malin

On a lonely planet along the rode less chose
From Robert Frost to Robert Frank
And every glory hole And I sprayed my love with the vultures and the crows
With a lust for glory and a poison rose You can take the freeway down
You can take the freeway
Come on, come on
You can the freeway down I used to be an optimist before the adult crash
With all the western promises
And everything we trash
And the sun came down on the our dirty lives of blue
And it's been so long since you rock me like you do You can take the freeway down
You can take the freeway
Come on, come on
You can the freeway down Ignited, ignited And we drove all night for the last temptation
Come on, come on, come on
And we danced all night in illumination
On, and on, and on I've been deflowered, I've been decieved
I've buried friends and I've planted seeds With the ghost of god and the art of hate
And all the love you can navigate
You used to be a pretty girl
You used be a pretty
Come on, come on
You can take the freeway down Ignited
