

Summer Days (feat. Macklemore & Patrick Stump)

[Martin Garrix](#)

I got this feeling on a summer day
Knew it when I saw her face
I just thought that she could be the one She looks good in the morning
And she dont even know it
I dont want you to go yet
Can we stay in the moment? Dont look in the mirror
Look into my eyes
When you see your reflection
You see what I like
Ah You look good in the morning
And you dont even know it
I knew that
I got this feeling on a summer day
Knew it when I saw her face
I just thought that she could be the one
I got this feeling on a summer day
Knew it when I saw her face
I just thought that she could be the one Sundress with you on my arm
Take the coupe out the garage
Pull the roof back
Just me, you and the stars
Toast to the gods
She's the one
A master piece
She a drug
Got a fast release
Got me sprung
Wrapped in sheets
Wake up fuck
And then we going back to sleep
(She do this)
(Bet her that last night was a mistake)
(We do this)
(I bet her that I'd stay home for mistake)
(We do this)
(Bet her that this one is a mistake)
(We do this)
(I bet her when I stay home for mistake) Oh
Me and you on an island
With the ocean

Color struck in you iris
We're comfortable in silence
But I prefer when we wilding
Sundress
Nothing underneath
As we undress
You could look in my eyes
See I'm some mess
Couple of broken people
Trying to complete each other
Under one breathDont look in the mirror
Look into my eyes
When you see your reflection
You see what I like
Oh
You look good in the morning
And you dont even know it
I knew thatI got this feeling on a summer day
Knew it when I saw her face
I just thought that she could be the one
I got this feeling on a summer day
Knew it when I saw her face
I just thought that she could be the one(That she could be the one)
(Bet her that last night was a mistake)
(We do this)
(I bet her that I'd stay home for mistake)
(We do this)
(Bet her that this one is a mistake)
(We do this)
(I bet this all that)
She could be the one
