

# Tombstone

## The Temper Trap

Lines all around me  
Truth can be lies and the devil don't want you free  
Can anybody be, on my one that's around  
No one cage no, let me out On mark our tombstones but the family still cares  
There were so many words i should've never care And oh, you got stuck inside the \_\_\_\_  
But i cut you free, but i cut you free  
And oh, i stare at your wounds for how long  
For how long, for how long, for you  
For how long, for you  
Solitudes of never \_\_\_\_  
And now your loves bound your feet  
And you cast in shadows to this evening  
I never knew how it could be  
I took a lot, i took once more  
I want to do something to show you to me  
Cause you know that no one really knows me And oh, you got stuck inside  
But i caught you free, i caught you free  
And oh, i stare at your wounds for how long  
For how long, for how long, for you  
For how long, for you On mark our tombstones but the family still cares  
There were so many words i should've never care Oooh oooh  
I caught you free, i caught you free  
Oooh oooh  
I caught you free, i caught you free  
And oh, you got stuck inside  
But i caught you free, i caught you free  
And oh, i stare at your wounds for how long  
For how long, for how long, for you  
For how long, for you On mark our tombstones but the family still cares  
There were so many words i should've never care
