

# Funny

## Gerald Levert

It's gonna be one of them days  
I can feel it On a day like today  
I got out of bed, upped and went my way  
Tryin' to find some peace within  
But here ain't no rest for a weary man Everything seemed to get me down  
Looking everywhere just to find a smile  
Then the phone rings and an angel sings  
"Hello, hello" And it's funny you should call today  
It's been too long, thought you just moved on  
And it's funny you should call today  
You always found a way to make my day  
Girl, tell me how is your family  
I can't believe that you thought of me, baby  
Baby, my heart is beating fast  
You don't know how much I missed our past, yeah Seen a friend of mine a month or so  
She said, you're doin' well, you've got it going on  
Then the phone rings and an angel sings  
"Hello" And it's funny you should call today  
It's been too long, thought you just moved on  
And it's funny you should call today  
You always found a way to make my day Baby, it's like you know when I was down and out,  
yeah  
Like in the past when you would bail me out, baby, baby  
And I just want to wanna thank you, girl  
Just to hear your voice, girl, it changed my world  
And it's funny you should call today  
It's been too long, thought you just moved on  
And it's funny you should call today  
You always found a way to make my day Ain't it funny 'cause you should call today  
I think 'bout it all [Incomprehensible] babe, it's yeah, yeah  
And it's funny you should call today  
We can just be friends, babe, ain't got to be your man  
No way, no way Said, it's funny, funny you should call me  
'Cause I've been thinking 'bout it, babe  
I've been thinking 'bout it, I've been thinking about it, baby  
And it's funny, you should call me Funny you should, funny you should call me  
Said, call me [Incomprehensible]
