

# Up There With You

Patti LaBelle

Look into my eyes,  
that's when i saw the possibilities,  
of a love so right,  
it took me by the hand,  
and gently calmed the fear inside of me,  
We can reach the sky,

I never shall forget, the first time we tried,  
We soared so high above the world,  
Ya love was all it took for me to know

I want to be up there with you, soaring high til yall love meets mine,  
we can journey to who knows where,  
it doesn't matter,  
as long as you are there,  
baby we've got all our love to share  
the magic of our love is in the air

Riding on the wind, i know that i've been caught up in your stream  
Gonna fly with you, now we're free to love,  
going where we've never been better  
As it takes us higher  
Baby you're there one, who showed me that there's nothing high enough to reach our love  
So take me on your wings because

I want to be up there with you  
Soaring so high  
we can journey anywhere as long as you're up there  
Baby we've got all our love to share  
So much to share  
It doesn't matter as long you are there  
Baby we've got all our love to share  
the magic of our love is the are  
I want to be up there with you there baby up there with you
