

Future

Jagged Edge

I feel like I'm barely treading water
On some quicksand rising to my knees when you're not around
I'm breakin' every border every room
That pertained to us doing what we said
When we started out

And them church bells rangin'
Cupid straight sprayin'
And I done took my 5 shots in the heart girl (just me)
I don't need no medicine
All I really need is a touch from you
Girl I do see my future

When I look into your eyes
I see my future in you
Just like a new born child
I see my future in you
Girl I walk a million miles
To have a future with you
When I look into your eyes
I see my future with you

I see my future in you

I see my future in you

I see my future in you

I see my future in you

I see me and you across the border

In a nice little house on the water

Or a villa just for me and you

Using every inch of this room

But with the drama that's been poppin' off

It would be a shame if we can't do it

But that fat lady ain't singin'

That news dollar ain't hangin'

See I wanna take us back to the beginning

Another day was alright

We really couldn't stand the fight

I just want you here with me

Please don't take away my future

When I look into your eyes

I see my future in you

Just like a new born child

I see my future in you

Girl I walk a million miles

To have a future with you
When I look into your eyes
I see my future with you
I see my future in you
I see my future in you
I see my future in you
I see my future in you

You can catch me steadily day dreaming you
I can't think of nothing but you
But it's all that you want
Baby I want to be involved with you
Make me wanna be involved with you
And baby you're my future

When I look into your eyes
I see my future in you
Just like a new born child
I see my future in you
Girl I walk a million miles
To have a future with you
When I look into your eyes
I see my future with you
I see my future in you
I see my future in you

I see my future in you

I see my future in you
