

Let Me Through (feat. Dolvondo)

CG5

I want you to know
The ebb and flow of my own show
From head to toe
You will be scared
And not prepared
For what I have in store for you
I'm waiting for
My curtain call
Before I storm right through the hall
Knock knock, who's there?
Are you prepared
To finally meet your doom

Why do you close the door?
Come to me with open arms
There's so much we need to explore
I mean no harm

I sing my song all night long just for you
Please oh please, I'm on my knees, let me through
[x2]

I, I understand
You want to play
But this is what I have to say
Your presence here
Fills me with fear
That's the extent of my career
I don't know why
You even try
To sing me your dumb lullaby
No I can't flee, calamity
Is everywhere I turn

Why do you close the door?
Come to me with open arms
There's so much we need to explore
I mean no harm

I sing my song all night long just for you
Please oh please, I'm on my knees, let me through

[x2]

I will not let you through my door
I will not let you settle the score
Oh no. Oh no. Oh no. Oh no
The power, the power, the power
Oh no
