

# ONE TOO MANY (feat. Phonte)

## KAYTRANADA

To the left, take it back y'all now  
One night on the scene  
And they can see you  
Living like a star  
New Playboy fatigue  
They don't believe that  
It's tearing you apart  
All I really want  
Is just a night at home with her by candlelight  
But until I find that girl  
I'm gonna hit the floor and we gon jam tonight  
Just can't settle down not right now  
Whatcha need and whatcha like  
Drinks and girls of every type  
I had one too many  
I had one too many  
Sexy girls and city lights  
Planes and transatlantic flights  
I had one too many  
I had one too many  
One night on the scene and I can see you moving in the dark  
I don't want to leave and can't pretend to cause it's not in my heart  
All I really want  
Is just a night at home with her by candlelight  
But until I find that girl  
I'm gonna hit the floor and we gon jam tonight  
Just can't settle down not right now  
What you need and what you like  
Drinks and girls of any type  
I had one too many  
I had one too many  
Sexy girls and city lights  
Planes and transatlantic flights  
I had one too many  
I had one too many  
Breaking down your defenses  
In my arms yes you're defenseless  
Like you in court with a public defendant  
Star witness wanna sing?  
But if you on the team?  
We gon swing for the fences  
When it's go time on that goal line  
Shit, I be making the call  
Just gimme the ball I'll get you the inches  
Broads my age talkin marriage and babies

And I'm like been there done it, boss  
The young gals wanna love me long time  
But then you gotta listen to 'em talk  
Talkin me, me, me like she bout to single acapella on the steps of City Hall  
Some set the bar, some raise the bar  
I've passed the bar  
Lemme get you off I had one too many  
I had one too many  
I had one too many  
I had one too many
