

# Where Is Love

**Bobby Caldwell**

Once I believed in Cassandra  
A psychic whose words were profound  
She built my hopes up with prospects of love  
But love did not come around

Then I put faith in Aurora  
Her reputation was sound  
Now I'm here wondering where my money went  
The crystal ball let me down

In my daydreams  
I fall in love  
My search is through  
They're just daydreams  
Prophets say will soon come true

Where is love  
Where is the mystery girl  
I've always dreamed of  
Where is love  
Someone somewhere has an answer  
Tell me where is love

Can't help but think of Aladdin  
A myth only children believe  
Maybe his lamp has the power enough  
To send a lover to me

In my daydreams  
I fall in love  
My search is through  
They're just daydreams  
Prophets say will soon come true

Where is love  
Where is the mystery girl  
I've always dreamed of  
Where is love  
Someone somewhere has an answer

Tell me where is love
