

My World

Skip Marley

Baby love, it's nice to meet ya

I was checking you from across the room, oh baby, say

Nice to greet ya, yeah

I would like to spend some time with you (With you, with you)

Baby girl, you're so divine, yeah

Baby girl, you're one of a kind, yeah

Baby girl, you're on my mind, yeah

You can make me fall in love with you

Just by the way your body moves

You make me want to share my world

My world, my world, my world

One dance and I change my whole life for ya

One glance and I can't keep my eyes off ya

One chance to show you what my love can do

So blessed that I just get to vibe with you

No stress it's a natural high with you

One chance before the night is through, oh

Baby girl, you're so divine, yeah

Baby girl, you're one of a kind, yeah

Baby girl, you're on my mind, yeah

You can make me fall in love with you

Just by the way your body moves, say

You make me want to share my world

My world, my world, my world

My world

My world, my world, my world

My world

You can make me fall in love with you

Just by the way your body moves

You make me want to share (Make me want to share)

My world

My world, my world, my world
