

Talkin' Tennessee

Morgan Wallen

[Verse 1]

You say those city boys living in those high rise condos
Only left you feeling low
Those little smoke glass fancy cars sure go fast
But never got you where you wanted to go
All I've ever owned is an old Chevy truck
Cuddled up, get you falling in love on the bench seat

[Chorus]

Don't mind me, I'm just talking Tennessee
Girl don't blame me if I slip and call you baby
That's just my way of letting the lady know she's working on me
There I go letting my South side show
Whiskey whispering those little sweet nothing southernisms
Jack and seven sipping, hoping that you're digging on me
Talking Tennessee

[Verse 2]

You say the street lights only ever let you see the skyline
It's been a long time
Since the Milky Way, Jupiter, and Venus took your breath away
Yeah like you're taking mine
What you say we grab some tailgate underneath the stars
Catch a few fireflies in a moonshine jar

[Chorus]

Don't mind me, I'm just talking Tennessee
Girl don't blame me if I slip and call you baby
That's just my way of letting the lady know she's working on me
There I go letting my South side show
Whiskey whispering those little sweet nothing southernisms
Jack and seven sipping, hoping that you're digging on me
Talking Tennessee

[Bridge]

There I go letting my South side show
Whiskey whispering those little sweet nothing southernisms
Jack and seven sipping, hoping that you're digging on me
Talking Tennessee

[Outro]
Talking Tennessee
Talking Tennessee
