

Love On the Run (feat. Peter Cunnah)

Chicane

Like love on the run there will be tomorrows
The stars and the sun every beam I'll follow
Together we're dancing all night long
Together we're dancing on and on The sound of the drum keeps my soul depending
Each day and each night and it's never ending
Together we're dancing all night long
Together we're dancing on and on Like love on the run there will be tomorrows
The stars and the sun every beam I'll follow
Together we're dancing all night long
Together we're dancing on and on The sound of the drum keeps my soul depending
Each day and each night and its never ending
Together we're dancing all night long
Together we're dancing on and on and on
The sun
'Cause I believe now and then
If you could look into the sun again
Cause I believe now and then On the run
On the run
On the run On the run
On the run
On the run Like love on the run there will be tomorrows
The stars and the sun every beam I'll follow
Together we're dancing all night long
Together we're dancing on and on The sound of the drum keeps my soul depending
Each day and each night and its never ending
Together we're dancing all night long
Together we're dancing on and on
Like love on the run there will be tomorrows
The stars and the sun every beam I'll follow
Together we're dancing all night long
Together we're dancing on and on and on
