

# Traci Lords

## SAINT JHN

[Chorus]

I told 'em pick up 'cause my favorite porn star is a white girl  
She said she goin' next, it's my turn  
I might just give her that and shit you might learn  
Some things you might learn

[Verse 1]

My favorite porn star is a big titty, bitch is jiggy, sex super litty  
She said if you with it, you can get it, just don't leave a hickey  
I ain't ever talkin', never fuckin' talkin', beg your fuckin' pardon  
Poppin' 'cause you know you got it, clappin' but you know you got it  
Sin city, bitch is gritty, favorite rapper Biggie  
Shawty bottle-poppin', product coppin', ballin' Michael Bibby  
When you know you winnin', poppin', overspendin', pussy co-dependent  
Younger boppers, older women, Gucci chokers over linen

[Chorus]

White girl  
She said she goin' next, it's my turn  
I might just give it up, and shit you might learn  
Some things you might learn  
My favorite porn star is a white girl  
She said she goin' next, it's my turn  
I might just give it up and shit you might learn  
Some things you might learn

[Verse 2]

My favorite porn star is a border man  
Bet you thought you had it but she sorta had it  
Fuck the quarter how she threw it at me like she quarterbackin'  
You're the one, tell 'em you're the one  
I need muscles, send me 40 to the 40 floor  
And bring 'em, bring 'em all at once  
Big titty, bitch is witty, body just like Iggy  
Like 'em black on black on black, this time you'll forgive me  
I ain't ever talkin', never fuckin' talkin', beg your fuckin' pardon  
Now I'm on my Cameron Diaz, Katy Perry, Dolly Parton  
Life, you know the life  
I told her pop it every night, that's good advice  
I mean she's in love with the lights, she love the lights

I said, well do that, that's my spice, my fuckin' spice

[Chorus]

My favorite one is a white girl  
She said she goin' next, it's my turn  
I might just give it up and shit you might learn  
Some things you might learn  
My favorite porn star is a white girl

[Outro]

Oh no

[?]

Baby, you're a brand new weapon  
Go ahead and let it happen

[?]

Baby, you're a brand new weapon  
Throw it back and let it down
