

Duke

Cate Le Bon

[Verse 1]

On Market Square, we were carried away
We studied entire empires when you were Duke
We landscaped our legacies and thought about wars

[Chorus]

I don't know how we have come to function so far away
Drifting in darkness with the compass we've made
You know it's our best work
I'll see you here, here, here

[Post-Chorus]

Where the weather licked your face dry
The weather licked your face dry

[Verse 2]

I am half-bidden, you are half-hidden
Until the arms close, scheduling tides
Pitching up in our paths will never grow old to me

[Chorus]

I don't know how we have come to function so far away
Drifting in darkness with the compass we've made
You know it's our best work
I'll see you here, here, here

[Post-Chorus]

Where the weather licked your face dry
The weather licked your face dry
The weather licked your face dry
Where the weather licked your face dry

[Chorus]

I don't know how we have come to function so far away
Drifting in darkness with the compass we've made
You know it's our best work
I'll see you here

Here, here, here, here, here
