

# One Minute

## Krewella

Stay here... see me come undone  
Just breathe my soul and turn me on  
Lay me down and stop the time  
So long, now leave the world behind We got one minute, you know there's no other  
It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin' We got one minute, you know there's no other  
It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin' Stop the time—  
So long, now leave the world behind  
Get me on the rise; get me, get me on the up and up  
When I thrash and cry, baby you ain't goin' rough enough  
I'm your kitty girl and your back is like my scratchin' post  
C'mon make me scream like I— like I— like I— seen a ghost Drink up I'm soaked  
I'm like the dopest dope you've ever smoked  
These feelings you evoke  
I only need one minute till I get you in a stroke Stay here, see me come undone  
Just breathe my soul and turn me on  
Lay me down and stop the time  
So long, I'll leave the world behind We got one minute, you know there's no other  
It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin'  
We got one minute, you know there's no other  
It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin' (Walk out!) Look into my eyes, say you're never  
gonna give it up  
Try'na get my prize, it ain't yours until I get enough  
Boy, I got you spun  
You're like "when it rains, it really pours"  
You know my body rocks...  
What you, what you, what you waitin' for? Drink up, I'm soaked  
I'm like the dopest dope you've ever smoked  
These feelings you evoke  
I only need one minute till I get you in a stroke  
We got one minute, you know there's no other  
It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin'  
We got one minute, you know there's no other

It's too late, we're in it, you're blowin' my cover  
Take me to heaven and back in a second  
Light up this fire before you come rushin'
