

Love Never Fails

[Kem](#)

We hope and pray love will find us
And we often stay in spite all the shame
We try to hide from the pain I hope that you love again
And I want you to understand
You're my joy, girl
My love won't fail you now We said our goodbyes, baby
And you're no longer mines, hey
But remember one thing, hey girl
My love for you will never fail
Half shame on you
And half shame on me
Staying here for so long
When we both know it was so wrong, baby I want for you something better
And I hope you do stay forever
In my heart, girl
My love won't fail you now
But what we had
Would never last today, baby
Oh, my love, girl, yeah
My love won't fail you now In my heart you'll stay
Love never fails
