

# Work

## Jimmy Eat World

[Verse 1]

If you only once would let me  
Only just one time  
Then be happy with the consequence  
With whatever's going to happen tonight  
Don't think we're not serious  
When's it ever not?  
The love we make is give and it's take  
I'm game to play along

[Pre-Chorus]

All I can say, I should've said

[Chorus]

Can we take a ride?  
Get out of this place while we still have time

[Verse 2]

The best DJs are saving their slowest song for last  
When the dance is through, it's me and you  
Come on, would it really be so bad?  
The things we think might be the same  
But I won't fight for more  
It's just not me to wear it on my sleeve  
Count on that for sure

[Pre-Chorus]

All I can say, I should've said

[Chorus]

Can we take a ride?  
Get out of this place while we still have time  
You want to take a ride?  
Get out of this place while we still have time  
Yeah, we still have time

[Bridge]

I can't say I was never wrong  
But some blame rests on you

Work and play, they're never okay to mix the way we do

[Pre-Chorus]

All I can say I should've said

[Chorus]

Can we take a ride?

Get out of this place while we still have time

You want to take a ride?

Get out of this place while we still have time

And we still have time
