Second Emotion (feat. Travis Scott)

Justin Bieber

Try to bite my tongue but I can't take it
I got whiplash from me turning my head
There's somewhere else to go no I can't make it
I would rather take my chance with you instead
Do you second that emotion
Do you second that emotion
You really got me open
Do you second that emotionHigh heels on her you come forward I see you
Movies all around but you look like the feature
Had another meeting now my plan is to meet you
Got my hands out all I wanna do is reach you
All I wanna do is greet you
Infatuated sorry if I stare
The way you pose it up, I wanna be there
The way you curved up, it just ain't fair
No it ain't
Try to bite my tongue but I can't take it
I got whiplash from me turning my head
There's somewhere else to go no I can't make it
I would rather take my chance with you instead
Do you second that emotion
Do you second that emotion
You really got me open
Do you second that emotionGot me feeling giddy like la la la la
Struck a match it got me litty like la la la la
You got the keys to my city like la la la la
Do you second that emotion babeDid I come across your radar
Cross your mind now and later
Do you feel like you know me
This is the part of nature
Let's ask each other questions
Can we do each other favors
Would you mind lay back, lay back
Try to bite my tongue but I can't take it
I got whiplash from me turning my head
There's somewhere else to go no I can't make it
I would rather take my chance with you instead
Do you second that emotion
Do you second that emotion
You really got me open
Do you second that emotion
