

Video (feat. Jarry Manna)

[nobigdyl.](#)

[Chorus: Jarry Manna]

Baby girl a diamond got a pretty soul (pretty soul)

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video

Shining bright enough to make the city glow

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video

[Verse 1: Nobigdyl]

You got the juice

You got the juice girl

I give you diamonds

I give you pearls

I got that grooves

When you get your girls

Hop on this carpet

Show you new worlds

Hop in this photo booth

I got some kisses to blow to you

I got some wishes I know came true

I feel the richest when close to you

I'm not ashamed

I'm in love

We call that wifey for guys

They look at me so surprised

But I cannot see cause I'm lost in her eyes (yeah)

I was a hopeless romantic

And none of my haters could stand it (yeah)

My heart was broken and damaged

Baby girl put on a bandage

Hold up

Sometimes she could be a savage

Sometimes I'm real hard to manage

Well baby girl

You can believe me that this ain't no average

I'm here forever

We never severed

First, comes loving and marriage

Then I can say baby carriage

But first take some time just to cherish

I hope this don't make you embarrassed

I hope you forgive me for staring

[Chorus: Jarry Manna]

Baby girl a diamond got a pretty soul (pretty soul)

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video

Shining bright enough to make the city glow

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video

[Verse 2: Nobigdyl]

I'm just cool forever

I thought I would write you a little letter

About how I would like you to be my better half

Want to be a better man

No one treats you better than me

On the late nights, I can be your Letterman

When it rains, I'll be your umbrella man

Be your veins IV, be your medicine

Turn a rude boy into a gentleman

I know that I lied to you and made it hard

But the light shines brightest in the dark

And it's in the dark

Where we found a spark

To light the path to each other's heart

I knew from the start I would die for you

Still learning how to live this life for you

Sometimes, I hide

But you know my pride gonna get crucified for you

Carry you like a Jansport

We go places like passport

Yeah I know that I'm adored

This is just to say that I adore

Give you shelter like a landlord

Me and my love come running

100 miles on the dashboard

Break through the walls like a taskforce

[Chorus: Jarry Manna]

Baby girl a diamond got a pretty soul (pretty soul)

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video

Shining bright enough to make the city glow

I might have to put her in a video (video)

Mess around and put her in a video (video)

My girl look so pretty need a video
