

Stars (feat. Jonny Rose) [Radio Edit]

Vicetone

I've been reading the stars I've been reading the stars I've been reading the stars I've been reading
the stars Seems like we're meant to be,
It played out like a prophecy,
You came on like a vision in the dark,
Like the daylight through the stars.
If it's hard to read,
One look at the sky and you'll see,
Don't take it for granted,
When the planet's all alive.
I've been reading the stars,
I've been moving you're heart,
So we can be together again,
So we can make it 'till the end.
I've been reading the stars,
I've been counting the hours,
So we can be together again,
You and I. I've been reading the stars I've been reading the stars I've been reading the stars Seems
like we're meant to be,
It played out like a prophecy,
You came on like a vision in the dark,
Like the daylight through the stars.
If it's hard to read,
One look at the sky and you will see,
Don't take it for granted,
When the planet's all alive.
I've been reading the stars,
I've been moving you're heart,
So we can be together again,
So we can make it 'till the end.
I've been reading the stars,
I've been counting the hours,
So we can be together again,
You and I. I've been reading the stars I've been reading the stars I've been reading the stars I've
been reading the stars
