

# The Royal We

## Silversun Pickups

We are ready for the siege  
We are armed up to the teeth  
Be careful how you live and breathe  
Release what's broken underneath How many times do you want to die  
How many ways do you want to die To feel safe again look over your shoulder  
Very carefully look over your shoulder We can laugh about it now  
We hope everything works out  
Be careful how you lick your wounds  
Believe the change is coming soon How many times do you want to die  
How many ways do you want to die To feel safe again look over your shoulder  
Very carefully look over your shoulder  
You used to do a little but a little won't fly  
And right before you hit your prime  
That's when we fell in love but not the first time Can it please you still  
Renaming your father's will  
Or does it make you ill  
Let us bruise their knees  
We will aim straight for the feed  
You'll be relieved  
So relieved so relieved Turn on full desire  
Feel the sparks of the friendly fire  
Misery inspires  
Your throat has been cut  
Several times before  
Never noticed the size of the flow  
Make it be ignored  
To feel safe again look over your shoulder  
Carefully look over your shoulder You said you believed it but believing won't fly  
And right before you hit your prime  
That's when we fell in love but not the first time And when it's all over and you open your eyes  
To see the room turned on its side  
You'll be lying by a note on the floor signed.....the royal we  
The royal we  
The royal we  
The royal we  
The royal we  
The royal we  
The royal we  
The royal we  
Love, the royal we
