

# Learn to Love

## NEEDTOBREATHE

I need the fear of a love that's lost  
I need to stop trying to count the cost  
I need to fight on the losing side  
And always hold true  
I will always stay with you Till we know the pain of a broken heart  
We can't walk through the fires we didn't start  
Just hold on to the way it is tonight  
And learn to love through the darkness and the light  
I'm on your side  
I had the fortune of a second chance  
I know the reason why we all should dance  
I've seen the end and all you have to do  
Is always hold true  
I will always stay with you Till we know the pain of a broken heart  
We won't walk through the fires we didn't start  
Just hold on to the way it is tonight  
We can learn to love through the darkness and the light  
I'm on your side Always hold true  
I will always stay with you  
Till we know the broken heart  
We can't walk through the fires we didn't start  
Just hold on to the way it is tonight  
And learn to love through the darkness and the light  
Oh, learn to love
