

Rubik's Cube

Athlete

The world is too heavy
Too big for my shoulders
Come take the weight off me now
Thousands of answers
To one simple question
Come take the weight off me now

Oh I'm like a kid who just won't let it go
Twisting and turning the colours in rows
I'm so intent to find out what it is
This is my rubik's cube
I know I can figure it out

Lost in the playground
Late night nostalgia
Open the sky for me now
Friends round the fire
Outside in december
Open the sky for me now

Oh I'm like a kid who just won't let it go
Twisting and turning the colours in rows
I'm so intent to find out what it is
This is my rubik's cube
I know I can figure it out

Credits all over
The edge of horizons
That I haven't discovered yet
