### Verse

Late at night, I been roaming, I ain't getting no sleep (Woah)  
It's hard to stay focused when that pain running deep  
Been alone my whole life, but you helped me forget  
Then you made me remember my heart cold as December  
Learning to love myself, I been alone every weekend  
They say he's out of breath 'cause he's been runnin' from demons  
You left, I needed help, you were someone that I believed in  
People change like the seasons, I'm asking what's the reason?  
Then I been thuggin' dolo, lay in my bed and cut off my phone  
I smoke that dope alone, me and others don't get along  
You can peep the pain in my face but I hide it deep in these songs  
I learned to keep my mouth closed 'cause don't nobody know what's wrong  
Got me addicted to love, and then you left 'round the same time  
Sorry I can't make time, been living on space time  
I heard through the grapevine she told you we FaceTimed  
That shit got a block, tell that bitch to kick rocks, yeah, yeah

### Chorus

And I don't want no more love, I feel it's poison
