

# Black Bear

Andrew Belle

Help, help  
I'm drowning  
In the sea where I found you  
The kerosene in your skin  
The chemistry that I'm bound to

Picture me on an ocean  
In a chest that I hollow  
I picture you in slow motion  
Somewhere in west Colorado  
Well, I don't know where that place is  
If I did I would follow  
I don't know what this taste is  
If I did I would swallow

Thought I knew all the answers  
Thought I held all the keys  
The black bear that I led you too  
Wants more than I can speak

Thought I drew out the cancers  
Thought I fell the disease  
Turns out that I need you now  
Much more than you need me

A track meet in my car  
Complicates what I told you  
The back beat in my heart  
Syncopates when I hold you

Well, I don't know what the use is  
If I did I'd unfold you  
I don't know what the truth is  
If I did I'd have told you

Thought I knew all the answers  
Thought I held all the keys  
The black bear that I led you too  
Wants more than I can speak

Thought I drew out the cancers  
Thought I fell the disease

Turns out that I need you now  
Much more than you need me
