\$uicideBoy\$ & Travis Barker

[Verse 1: Norman Atomic]

Suicide, suicide, let's all commit suicide
End the human race just like the dinosaurs, I can't decide
Would you rather drink the punch or do you wanna burn alive?
No salvation, salutations, nothing left after we die
(Feed me with your hate) Yeah, now that's a fucking start
(Stab me in the skull) Make sure that the blade is sharp
(Put my body in a ditch) Let the larva eat my heart
(Infest my dead body) Let it rip my flesh apart

[Chorus: Norman Atomic & Anthony Mars]

War, power, sickness, death
Famine, terror, toxic sex
Hate, fear, greed, stress
Fire, ashes, nothing left

[Verse 2: Anthony Mars]

Spit in my face, kick me when I'm down
Leave me to drown, lords of the underground
Trash my brain, bash in my skull
Pass me the gun, I'll make you void and null
Nails in my hand, nails in my feet
Crucify me, crucify me
Penetrate my ribs with the blade
Call on the Greys, then let us pray

[Chorus: Norman Atomic & Anthony Mars]

War, power, sickness, death
Famine, terror, toxic sex
Hate, fear, greed, stress
Fire, ashes, nothing left
War, power, sickness, death
Famine, terror, toxic sex
Hate, fear, greed, stress
Fire, ashes, nothing left

[Outro: Norman Atomic & Anthony Mars]

Nothing left
Nothing left
Nothing left
Nothing left
