

Got Each Other (feat. Rancid)

The Interrupters

If you are alone tonight
You can come with us
If you don't have friends or family
Or people that you trust
We will be your confidants
Your sisters and your brothers We don't have much
But we got each other
We don't have much
But we got each other Through all the heartache
We find a way to smile
And if you were in trouble
I'd walk ten thousand miles
And when that storm comes around
Well I will be your cover
We don't have much
But we got each other
We don't have much
But we got each other Hard luck and tough times
Always around the bend
Without your love and friendship
And a kind hand to lend
Well I'd be so lost
Out to sea without a rudder We don't have much
But we got each other
We don't have much
But we got each other
Make our home in this sacred ground
We've been here for years
Solid in foundation
The blood, the sweat, and tears
Raise your voice, stand side by side
And we will sing forever We don't have much
But we got each other
We don't have much
But we got each other If you are alone tonight
You can come with us
If you don't have friends or family
Or people that you trust
We will be your confidants
Your sisters and your brothers You ready?
One, two, three, four We don't have much
But we got each other

We don't have much
But we got each otherWe don't have much
But we got each other
We don't have much
But we got each other
