

# Just Friends (feat. Amber Mark)

## Chromeo

I bark, you bite  
Whatever it is, it ain't right  
It's not intentional, but tension is running high  
My time, your world  
I sit back and watch it unfurl  
They can't blame me because I'm worried about my girl We fight every night and day  
And make for it right away  
This is driving me insane  
But I still love you anyway  
Yeah anywhere you want to put it  
Bite my tongue or bite the bullet  
Said a couple things I shouldn't  
I would take back if I could  
If things fall apart again  
I know you know we can go back to being just friends  
May feel like we're wrong in the end but  
I know you know we can go back to being just friends  
We can go back to being just friends Speak once, think twice  
Looks like you put me on ice  
The ice is melting every time we dim the lights  
I'm dim-witted, deal with it  
You said something slick, I didn't get it  
And now I wonder if our love is counterfeit All these questions on my mind  
Is this all some sort of sign?  
Is this love or am I blind  
Or are we headed for decline?  
I decline to answer that  
But I'm inclined to state the facts  
We stay on each other's back  
Because opposites attract  
If things fall apart again  
I know you know we can go back to being just friends  
May feel like we're wrong in the end but  
I know you know we can go back to being just friends  
I know you know we can go back to being just friends I just can't forget when you're touching  
me right  
I melt in my head got me feeling so high  
The aftereffect boy you're fuckin' me up  
May not be correct but I can't get enough I just can't forget when you're touching me right  
I melt in my head got me feeling so high  
The aftereffect boy you're fuckin' me up  
May not be correct but I can't get enough I just can't forget when you're touching me right

I melt in my head got me feeling so high  
The aftereffect boy you're fuckin' me up  
May not be correct but I can't get enough I just can't forget when you're touching me right  
I melt in my head got me feeling so high  
The aftereffect boy you're fuckin' me up  
May not be correct but I can't get enough
