

# Highlights

Mike G

I'm ready to rock, too much hop in my coupe for stop  
So proud I'm one of the few to move a block  
I got a problem with disolvatin' the rules  
I cop so much they gonna put me under surveillance  
Watch I'm cancerous  
Guaranteed if this makes list  
It's fuck what's next you should just replay this  
I want respect and much more  
Like show ready cuff of that show room floor  
They don't compare to Oz or anything you hear us play  
They can't relate, I live day to day like I'm a cast away  
When they say it's time for the bey, I must talk,  
My case's great, got no time to waste because I'm suddenly makin' people hate me  
But it's not an issue  
Find some money, find someone to count it with you  
Now you make the calls when you ball cause you so official  
This is this  
This is, this is this is to you  
Get you shits, start fucking with my triple six squad  
Countdown start it loud I'm ready for lift off  
No one stands this tall  
No one is this raw  
They pay off when you finally pay the price that's right  
This is how I need life, living like highlights  
I'll be there all day, all night, all right  
It's my commitment  
That I get on the mic and rip rappers  
Brakin' racks and off recitin' things  
I'm cold and relentless  
Smoking my edge and if I could carry stadium lights  
They shine like the sun when I open my windows  
See once you know flow hotter than desert sands in Pakistan  
Promise that I'd never turn back  
I took and stand, sixteen's looking for ways out, a different man  
So I couldn't take the same route either a different plan  
I need a new view, this game needs a lesson they haven't received in school  
And that's true with royal blue, and king you could be too  
You believe then you cool,  
But believe they come for you  
And soon if I could choose I'd be Midas without all [?] or rules  
Then how could I lose, I wonder why they're so confused  
I know life isn't easy but don't let it get to you

It's a war zone you take every step to make it through  
That's the truth  
Dig deep to find the treasure you want  
I'm a menace each of your societies at once  
Get your shits start fucking with my triple six squad  
Countdown start it now I'm ready for lift off  
No one stands this tall  
No one is this raw  
They pay off when you finally pay the price, that's right  
This is how I need life, living like highlights  
I'll be there all day, all night, all right, ah
