Why don't you see that my creator is tru
Think about all the many different situations you been faced wit but only one who bought you
through

With a name that's above all nations, haters, fakers and gangstas, pimps, and prostitutes
There ain't another with his eye on the sparrow that can split blow the margana army of a
pharoh in the middle of a battle

Let me intorduce you to the mighty and majestic
King and creator above the all Heaven

The gun of the saints we goin rep Him till the day we fly away hide away into secret places

It's time to face the facts gon' take these stripes pharases

You hypocrites tryna battle me and what i believe I'm goin live Jesus Christ until I take my last
breath and leave this life

And can't nobody change my mind I been refined and redefined by the devine kind of mind that
can spit a verse create a universe

And reverse a curse by speakin' that verse but the curse is broken at last he came first

I can understand the night of praise cause what it's worth

Cause he saved my life, any other name that can give you life like the name Jesus Christ

And that's real, WOO!!!
