

My Love (Acoustic)

Jess Glynne

There's nothing more that I would have that I could need
Cause having this means that I've got it all
When I was taking turn and you were wrong for me
You chose to understand and let it go And oh, You've turn this black heart made it into gold
So I wanna let you know that My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my love
Looovve
Control is such an open end it worked for me
Something that I used to think I owned
I'm standing here with none I'm feeling so complete
You helped me understand to let it go And oh, You've turn this black heart made it into gold
So I wanna let you know that My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my love
Stay close to me, oh
Stay close to me, yeah, love
Stay close to me, love
My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my
My love and my touch, up above is made with the warmth of my love
