

Fake Palindromes

Andrew Bird

My dewy-eyed disney bride what has tried / swapping your blood with formaldehyde? /
Monsters? / Whiskey-plied voices cried fratricide! / Jesus don't you know that you coulda died
shoulda died / with the monsters what talk / monsters what walk the earth / she's got red lipstick
/ and a bright pair of shoes / she's got knee high socks / what to cover a bruise / she's got an old
death kit / she's been meaning to use / she's got blood in her eyes in her eyes for you / she's got
blood in her eyes for you / certain fads, stripes and plaids singles ads / run you hot and cold like
a rheostat I mean a thermostat / so you bite on a towel / hope it won't hurt too bad / she says I
like long walks and sci-fi movies / you're six foot tall and east coast bred / some lonely night
we can get together / and I'm gonna tie your wrists with leather / and drill a tiny hole into your
head
