

Coconut Oil

Lizzo

I remember back, back in school when I wasn't cool

Shit, I still ain't cool, but you better make some room for me

I'm comin' through with my crew at the rendezvous

Yeah, it's a party over here now

Yeah, it's a party over here now

If I knew then what I know now

I'd give myself a souvenir for old times' sake

'Cause I got all that I need here and I'm good yeah, yeah

I thought I needed to run and find somebody to love

But all I needed was some coconut oil

Don't worry 'bout the small things, I know I can do all things

Mama always told me it would be alright

I thought I needed the rush, but there was never enough

'Cause all I needed was some coconut oil

Don't worry 'bout the small things, I know I can do all things

Mama always told me that and she was right

It's a party over here now

It's a party over here now, yeah

It's a party over here now

It's a party over here now

It's a party over here now

It's a party over here now, yeah

It's a party over here now

It's a party over here now

When I look at you, I see me, so I do unto

You as I would do someone livin' in my two story

We got different stories, we under one roof

So when it spring a leak, we both got work to do

If I knew then what I know now

I'd give myself a souvenir for old times' sake

'Cause I got all that I need here and I'm good yeah, yeah

I thought I needed to run and find somebody to love

But all I needed was some coconut oil

Don't worry 'bout the small things, I know I can do all things

Mama always told me it would be alright

I thought I needed the rush, but there was never enough

'Cause all I needed was some coconut oil

Don't worry 'bout the small things, I know I can do all things

Mama always told me that and she was right

It's a party over here now

It's a party over here now, yeah

It's a party over here now

It's a party over here now

It's a party over here now

It's a party over here now, yeah

It's a party over here now

It's a party over here now
