

Missing You

Tank

Looking by my baby
Looking by my baby
Ooh
How I miss you, you
How I miss you, oh oh oh Miss the way you call out my name,
Miss you 'cause you don't feel the same
Miss you when I'm gone out my mind
Miss you when I'm running out of time
You gon' make a man take his equal on the spot
Push him aside, 'cause one more lonely night
I'm might die!
One more day I miss you, I might miss you
One more day I miss you, I might miss you
Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you Miss the way we danced to our song,
Miss the way we love all night long
Miss the way we make future plans
Miss you when I just don't understand You gon' make a man take his equal on the spot
Push him aside, 'cause one more lonely night
I'm might die!
One more day I miss you, I might miss you
One more day I miss you, I might miss you Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you
Ever since you left me, I've been waiting by my phone
I'mma keep on calling tryina find out what's going on
Ever since you left me, I've been making my own fool
Ever since you left me, I've noticed you did too
Ooh oh! Why why?!! One more day I miss you, I might miss you
One more day I miss you, I might miss you Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you
Baby I'm missing you, always you, always you Oh, my my my
Where's my baby baby baby? Everybody miss somebody?
I mean really really miss somebody?
Everybody miss somebody?
I mean really really miss somebody?
Gotta really really miss somebody?
I mean really really miss somebody?
Gotta really really miss somebody? Just tell them about you,
Anybody out there beside me?
Speak to me! It's like you got me here writing another sad song

Waiting inside, all I see is another pass gone
You moved on, you losing teams and that hurts
And when you look at it that's still team work
But the dream worked? No, I'm still sleep
If it was to open my eyes to things that really need,
Used to swallow my pride, but taste it ain't me
You ain't by my side,
This just can't be!
I'll still love you when you come back,
Welcome to his house and help you pack your bags,
You need me, and baby I need you
I'm missing you,
I can't continue to!Everybody miss somebody?
I mean really really miss somebody?
Everybody miss somebody?
I mean really really miss somebody?
Gotta really really miss somebody?
I mean really really miss somebody?
Gotta really really miss somebody?Miss you baby, uuuh
I mis you lady, baby
