

# Dyson Sphere III: Kardashev II.1 - The God Oven

## Alkaloid

Day and night have gone now  
Time to spawn now, a new dawn now  
Between twin skins  
Biogeny begins its spin  
Seeps along bionic skeletons  
Lines become vines become spines

Holoplasma  
Growing, imperial  
A clasping miasma

Conjoins  
Incubates  
What will awaken?  
Expands  
Incarnates  
What will awaken?

An iron prism  
To hatch a star  
An iron prism  
To hatch a star

Life seeking life finding life  
Surviving and thriving, the hive comes alive  
Lurching, searching, awed and flawed  
The church becomes god

We cling, we dive, we float, we forever  
Calibrate and navigate  
Hiccups of wars  
Swamps of infection  
Distinction and extinction

A sentient surge as minds merge  
What will awaken?  
Post-biotic ascension  
A continuous expansion  
All must converge now!

What will awaken?

The Great Beast stirs in a brand new body  
Profusion through astral veins  
Evolution sheds all chains

What will awaken?  
Kaleidoscope to mosaik to hologram

Code turns to spell  
Turns life forms to cells  
In circuits and covens  
The hive mind is woven  
Stirs in its shell  
The God Oven  
In its shell  
The God Oven
