

# Rearrange

Ella Vos

[Verse 1]

Pressing my way to the surface  
Wonder if I'll ever feel you close  
Stuck in my head, I can't get out  
Can you be sure that I'm worth it?  
Maybe we'll never even know  
All we can do is work it out

[Chorus]

So I rearrange, I try to change for you  
But you stay the same, no matter what I do  
We drift away, into the deepest blue  
And I can't explain, everything that I do  
So I rearrange

[Verse 2]

Finding our feet in a strange place  
Everyone whispers in my room  
I hold my breath to feel alive  
Can you be sure it's the right way?  
Everything comes a day too soon  
And you never remember the last time

[Chorus]

So I rearrange, I try to change for you  
But you stay the same, no matter what I do  
We drift away, into the deepest blue  
And I can't explain, everything that I do  
So I rearrange

[Bridge]

Slowly speakin' under your breath  
Faded voices swallow the rest

[Chorus]

So I rearrange, I try to change for you  
But you stay the same, no matter what I do  
We drift away, into the deepest blue  
And I can't explain, everything that I do

So I rearrange
