

# Burn (feat. Benjamin Rea)

[nobigdyl.](#)

[Intro: Benjamin Rea]

I'm so jealous, I'm so jealous, I'm so jealous of you

Look at what you been doing

I wish I succeeded there to

I'm so jealous, I'm so jealous, I'm so jealous of you

Making me look like a fool

There's no telling what I could do

Because I'm so jealous

[Verse 1: nobigdyl.]

I think I'm sick

I don't feel decent and

Physically I feel fine

But I realized that lately I can't be content

When I see my friends winning on the internet, boy

I fall deeper in

Like it and retweet it then

I vow that I will beat them when

I drop, search my mentions for some hot

Look through beats and then I cop  
Write a sixteen that's gon' pop  
Then my chest tell me to stop  
But I pay my dues when I spray these fools  
Besides this hip hop since when a rap dude got to play by rules  
Then the good doctor said it's an emergency  
He sat me down in his office and say lay back let me see  
He dilated my pupils and saw my iris turn green  
I'm covered in coveting, I'm drowning in jealousy

[Hook: Benjamin Rea]

See the flames  
Growing higher  
Taste the smoke  
Feel the fire  
I have build, my empire  
Just to burn, just to burn  
See the flames (just to burn)  
Growing higher (just to burn)  
Taste the smoke (just to burn)  
Feel the fire (just to burn)  
I have build (just to burn), my empire (just to burn)  
Just to burn (just to burn), just to burn (just to burn)

[Verse 2: nobigdy1.]

I really lost friends, I really lost friend this year  
Over my sin, the pain is relentless here  
I'm feeling the tension, filling these benches with tears  
I'm seeing division here, this is an addiction here  
Selfish ambition, I think I wrote it off as competition  
I think I want you to know that I'm gifted  
I think I've been ignoring that it's given  
It's more important that I've been forgiven  
And the forgiver has risen  
I wanted to hop on beats and just kill them  
I think I made all my brothers the villains  
But this highness let me levitate  
Over forest flames  
I'm flying while he devastate  
Heaven's sake, he got me so inspired  
This is dire, don't expire trying to build your temple higher

[Hook: Benjamin Rea]

See the flames  
Growing higher  
Taste the smoke  
Feel the fire  
I have build, my empire  
Just to burn, just to burn  
See the flames (just to burn)

Growing higher (just to burn)

Taste the smoke (just to burn)

Feel the fire (just to burn)

I have build (just to burn), my empire (just to burn)

Just to burn (just to burn), just to burn (just to burn)

[Outro: nobigdy1.]

You can see the forest fire smoking

Living water won't you rain I need your hydrant flowing

Gates to my empire open

Won't you come and take your throne

This your home
