

# Out of the Blue

Ryan Leslie

I light a candle for you tonight... yeh...  
said I reminisce over you, babe... reminisce over you... yeh...  
listen...[Verse 1:]  
should've spend more time... been a part of your life... and made you more part of mine... guess  
it's too late now...  
I should've been a better friend... and done my best to understand you...  
still it's hard to think that we're done... we through...[Chorus:]  
now what would you do... tell me... if I left you out of the blue... would you fight back tears  
while your heart gets torn to pieces... cause that's what I did when you... left me out of the  
blue... love can feel so good and then suddenly it's over... yeh  
[Verse 2:]  
I should've been more true... takin' better care of you...  
like I was supposed to... guess it's too late now...  
I should've told you how I felt... instead of thinkin' of myself...  
still I can't believe you went away so soon...[Chorus:]  
now what would you do... if I left you out of the blue... would you fight back tears while your  
heart gets torn to pieces... cause that's what I did when you... when you left me out of the blue...  
it's funny how love feels good and then suddenly it's over...[Bridge:]  
now when I ask myself... it's hard to see... how you can be anywhere but here with me... you  
said that you needed space and time... so you would be able to make up your mind... you said if  
I set you free... one day you'll be ready to come back to me... did you really mean it? I hope you  
did... hope you meant it baby...  
[Chorus:]  
now what would you do... if I left you out of the blue... if I left you out of the blue... would you  
lose your mind and go crazy... cause I, I almost died when you left me... when you left me out  
of the blue... love can feel so good and then suddenly it's over... so what would you do... if out  
of the blue... I just left you... would it make you cry... keep you awake tonight... would it leave  
your heart sick and lonely... cause that's what you did baby when you... when you left me out of  
the blue... it's funny how love feels good and then suddenly it's over...that's right... I light a  
candle for you tonight, babe... yes I will, yes I will... cause I'm missing you... so I light a candle  
for you baby... for us... for me and you...  
lalalala... lala lala... lalala ... lalalala...
