

Operate (feat. Kenny Glasgow)

Hot Natured

I can't operate
I can't operate I can't operate, until your back again
I can't operate, until your back again
I can't operate, until your back again
I can't operate, until your back again Love, controlling me, constantly
In and out of love
Endlessly, Why must I be
In and out of Love, controlling me, constantly
In and out of love
Endlessly, Why must I be
It's getting hard to communicate
I just can't operate
It's getting hard to communicate
I just can't operate It's getting hard to compute, I need to reboot
I can't operate
I need to redesign the circuits in my mind
I can't operate
Can't take this separation, froze off my calculations
n I can't operate
Static communication, confuses information
I can't operate System failure I'm losing control
you push the buttons, you play with my soul System failure I'm losing control
you push the buttons, you play with my soul
Love, controlling me, constantly
In and out of love
Endlessly, Why must I be
In and out of Love, controlling me, constantly
In and out of love
Endlessly, Why must I be System failure I'm losing control
you push the buttons, you play with my soul System failure I'm losing control
you push the buttons, you play with my soul
