

Pictureface

Input

I am not it
I live my life as a spectacle created with a paintbrush
Forget the radio for now I'm dying fameless
Categories flopped communications failed us
It's difficult to see you blossom when your brains fucked
It was a problem that annoyed me like a papercut
Giving up on what you truly love to make a buck
Let's talk about ?you? later
Someone here's forsaken us
And I accept that where we were standing isn't shaped for us
My words are a product of involvement
With unfaithful counterparts that use me as a target
Never short at gambling life for a photoshoot
Better days are in my future cause I'm over you
Pardon me I'm moving forward with my train of thought
Pardon me and how?
Appreciate the voice I've got
One track to overthrow the modern activist stand me in the way of anyone who wants to
capture this
Look closely cause I am bound to make you activate the feelings of euphoria
That tend to make you salivate
When it's said and done you focus on the next line
I guarantee this album will improve your boring sex life
I promise that I'll never hold a feeling back
My third album is a mission to reveal this man
So charge up the flash if you wanna fly
And aim your cameras to the center of the sky
Chorus:
Fourty days alone thinking of the big mistake
To live my life without the stories from this pictureface
I won't succumb to any bullshit that the system say
I'll simply shut my mouth and let you watch the pictureface
Fourty days alone thinking of the big mistake
To live my life without the stories from this pictureface
I won't succumb to any bullshit that the system say
I'll simply shut my mouth and let you watch the pictureface
leave me alone please

And just like that it opens up a brand new passage
Of what you've seen from the crib to the casket
From the dreams to the where am I going
It seems so cliché to appear so important
The worlds full of anti progressive people

They bark a lot but their aggressive natures see through
The bottom line was written for your own sake
Its hard to find the perfect picture on this cold days
So bundle up and cancel out the torture
Give in see that this face was not designed for portraits
The negatives are absolutely fabulous
Light another cigarette and entertain the cameras
This is our chance to liven up the hearts pulse
A combination of a story and an art show
The blood stream will move at a different pace
So come along with me and analyze a pictureface
Chorus:
Fourty days alone thinking of the big mistake
To live my life without the stories from this pictureface
I won't succumb to any bullshit that the system say
I'll simply shut my mouth and let you watch the pictureface
Fourty days alone thinking of the big mistake
To live my life without the stories from this pictureface
I won't succumb to any bullshit that the system say
I'll simply shut my mouth and let you watch the pictureface
