

Slow Reveal

Adam Tell

[Verse 1]

We kept our intentions in the dark
And separated the tinder from the spark
I'm sure it's obvious to them
That we've been selling ourselves as just good friends
It doesn't matter how we plead
You're wearing my name, I've got your fingerprints on me
Sure, it's been fun to play the game
But it's time we called this by its real name

[Chorus]

Don't overthink the way we feel
Anticipate the slow reveal
We've engineered the perfect tale
We only need to part the veil
To see what's been there all along
See the truth behind the song
The preparations have been made
For the welcoming parade

[Verse 2]

Let's take a walk and talk this through
Relay the messages of love we hid from view
We should be clear about one thing
There's gonna be kisses flying all around the ring
Don't be afraid to lose control
Sit back, relax, and watch the fireworks show
The idea's always been the same
But it's time we called it by its real name

[Chorus]

Don't overthink the way we feel
Anticipate the slow reveal
We've engineered the perfect tale
We only need to part the veil
To see what's been there all along
See the truth behind the song
The preparations have been made

For the welcoming parade
