

It Should Be Easy (feat. will.i.am)

Britney Spears

I've been thinking, just sitting thinking
On why I love you and all the reasons
And if I lost you boy, if I lost you
I'd lose myself and I wouldn't feel the way I feel now
You bring me zen, yes you bring me zen
And you make me feel like a million billion
I let you in but don't you break my heart
Don't you rip me apart
Don't you rip me apart Baby love
It should be easy
It shouldn't be complicated
It should be easy
I don't know how or where else to say it
I've got visions boy, I've got visions
Of me and you happily just livin'
I know they're out there, them beautiful men
But you my future baby, you my right now
If there was a scale from one to ten
My love for you is a million billion
Boy I'll love you til the day I'm dead
So please don't mess with my head
Please don't mess with my head Baby love
It should be easy
It shouldn't be complicated
It should be easy
I don't know how or where else to say it
La di dee, la di dah
It's the only way you are
La di dee, la di dah
It's the only way you are
I don't know how to say it Baby love
It should be easy
It shouldn't be complicated
It should be easy
I don't know how or where else to say it La di dee, la di dah
It's the only way you are
La di dee, la di dah
It's the only way you are
I don't know how to say it
