

White (feat. John Mayer)

Frank Ocean

Could this be earth, could this be light
Does this mean everything's going to be alright
One look out my window there's trees talking like people
I dreamt of storms, I dreamt of sound
I dreamt of gravity keeping us around
I slept in the darkness it was lonely and it was silent
What is this love
I don't feel the same Don't believe what this is
Can be given a name
I woke you there chasing planets on my forehead
But I forget 23 like I forget 17
And I forget my first love, like you forget a day dream
And what of all my wild friends, and the times I've had with them
Will all fade to grey soon on the tv station
