

I Still Have You

Charlie Wilson

What good is a million dollars and a home
Without someone to share and give
What good is a bed if you're sleeping all alone
I'm so happy 'cause with you I'm never lonely

Even if it's not the wind in winter
Never see another white christmas
We would go through it together
Baby you can count on that

If I'm a star, I start hiding
And we couldn't make a wish again
Even if the sun stop shining
I wouldn't care because

I'd still have you baby
And you have me too baby
I'd still have you baby
And you have me too ye
I'll be here as long as I still have you

What good is a fancy car with no better goal
If you're just driving down an empty road
One thing for sure is my arms was made to hold
And these lips were made for you, so baby kiss me

Even if it's not the wind in winter
Never see another white christmas
We would go through it together
Baby you can count on that

If I'm a star, I start hiding
And we couldn't make a wish again
Even if the sun stop shining
I wouldn't care because

I'd still have you baby
And you have me too baby
I'd still have you baby
And you have me too ye

I'll be here as long as I still have you

Things may come and things may go

But I still have you

Seasons change I lose some friends

But I still have you

When my world is upside down

I still have you

Said I still have you

And you got me too

Even if it's not the wind in winter

Never see another white christmas

We would go through it together

Baby you can count on that

If I'm a star, I start hiding

And we couldn't make a wish again

Even if the sun stop shining

I wouldn't care because

I'd still have you baby

And you have me too baby

I'd still have you baby

And you have me too ye

I'll be here as long as I still have you

I'd still have you baby

And you have me too baby

I'd still have you baby

And you have me too ye

I'll be here as long as I still have you
